Special Issue

Sustainability of Post-disaster Recovery

Message from the Guest Editors

Disasters, whether natural or man-made, can have a devastating impact on human lives and the environment. The frequency and severity of disasters have been increasing in recent years, highlighting the need to strengthen the resilience of communities and enhance the sustainability of post-disaster recovery efforts.

This Special Issue aims to advance the knowledge and understanding of the sustainability of post-disaster recovery efforts. The scope of this Special Issue is two-fold: one is to explore the opportunities and challenges associated with post-disaster recovery, with a particular focus on sustainability, community resilience, and environmental management; and the other one is to provide insights into innovative solutions that can enhance the sustainability of post-disaster recovery efforts.

- -post-disaster reconstruction;
- -innovative approaches to post-disaster recovery;
- -inclusive and risk-sensitive development;
- -disaster risk reduction strategies;
- -community resilience;
- -environmental management;
- -policy and governance;
- -social and economic impacts of disasters.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
