

Special Issue

Sustainable Water Resource Availability and Pollution: Characterization, Future Scenarios and Solutions

Message from the Guest Editor

This Special Issue focuses on any topic related to the characterization and mitigation of current and future water availability issues such as water resources characterization/evaluation, contamination, treatment technologies (including nature-based solutions), and modeling (including climate change and future demands). Other topics included are socially driven, such as water-related conflicts, politics, and education, and area-specific, such as urban, desert, and forest environments. Keywords

- climate change
- water treatment
- hydrological modeling
- society
- sustainable water resources management
- water resources characterization

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
