

Special Issue

Towards Sustainability: The Geochemistry of Groundwater and Surface Water Systems

Message from the Guest Editors

This Special Issue aims to publish high-quality geochemical studies on groundwater and surface water systems. Geochemical methods coupled with other approaches (such as laboratory and field experiments, numerical modeling, machine learning, etc.) in order to understand interactions between surface water and groundwater systems are highly welcome in this Special Issue. In this Special Issue, original research articles and reviews are welcome, and research areas may include (but are not limited to) the following:

- The application of geochemical methods in surface water and groundwater quality evolution;
- Multiple approaches to understanding surface water and groundwater interactions;
- Geological disasters induced by the interaction between surface water and groundwater;
- Tracing water and substance circulation via isotopes;
- The geochemistry of thermal water circulation;
- Geological disasters related to the water cycle

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
