

## Special Issue

# Sustainability in Food Security and Food Supply Chain

### Message from the Guest Editor

Food security is one of the most important aspects of the strategic initiatives of countries worldwide. Achieving sustainable food security requires the creation of strategic initiatives by mapping the vulnerabilities of the food supply chain system and thus improving the resiliency of it. The research included in this Special Issue should aim to address the imperative aspects of the Sustainable Developmental Goals (SDGs), including Goal #1: no poverty, Goal #2: zero hunger, Goal #3: good health and well-being, and Goal 12: responsible consumption and production. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Technological innovations in food security and agrifood supply chains;
- Food safety interventions;
- Ethnography and grounded theory in food security studies;
- Food waste assessment of end-to-end food supply chains;
- Sustainable carbon footprints in the agrifood sector.

We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
