

## Special Issue

# Pavement Structures and Civil Engineering for Sustainability

### Message from the Guest Editors

This special issue aims to focus on the sustainable development of urban infrastructure, includes but not limited to the following topics: 1. Improvement of road and transportation facilities to ensure their robustness, safety and sustainability; 2. Maintenance of road surface structures to improve their smoothness, hardness and waterproof performance; 3. Innovation of material technology construction method to reduce environmental pollution and ecological damage caused by construction; 4. Optimization of road and transportation facilities management to ensure their safety and sustainability. Therefore, this issue intends to fill the research gaps in sustainable development of urban infrastructure. Accordingly, papers concerned with various planning and design elements related to the sustainable development and safety of transportation facilities are welcome.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
