

Special Issue

Green Logistics, Supply Chains, and Organizational Management in Sustainable Health Services

Message from the Guest Editors

The healthcare industry provides goods and services that are used to treat and control diseases but also generates waste. The waste generated by this industry affects the environment and community health. Healthcare service waste is an environmental concern requiring proper management and the adoption of suitable treatment strategies before its final disposal to reduce its harmful impacts.

It is also known that the healthcare services industry needs to more actively engage in the Sustainable Development Goals (SDGs). In the healthcare services industry, there is no culture or group dedicated to ensuring sustainability in strategic decisions. Academia and the market seek to respond to emerging global challenges by reducing waste and improving the performance of the supply chain organizations in the healthcare services industry.

The Special Issue "Green Logistics, Supply Chains, and Organizational Management in Sustainable Health Services" aims to gather reflections, findings, solutions, and models, positioning itself as an effective contribution to the theory and practices of sustainability in the healthcare services industry.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
