Smart City Governance, Advanced Digital Manufacturing, and Sustainable Business Models: Navigating the Data-Driven Landscape for Urban Sustainability

Message from the Guest Editor

In an era marked by rapid urbanization, technological innovation, and heightened environmental awareness, traditional paradigms in urban governance, manufacturing practices, and business models are undergoing a profound transformation. The emergence of smart cities, leveraging data and digital technologies, aims to enhance efficiency, elevate citizens' quality of life, and mitigate environmental impact. Concurrently, advanced digital manufacturing is revolutionizing production processes, fostering customization, and boosting productivity. The aim of this Special Issue is to delve into the dynamic intersection of Smart City Governance, Advanced Digital Manufacturing, and Sustainable Business Models, unraveling their interconnected influence on the future of urban development, industrial processes, and economic sustainability. This exploration aligns seamlessly with the overarching goals and focus of Sustainability, as we seek to illuminate cutting-edge research at the nexus of technology, sustainability, and urban studies. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
