

## Special Issue

# Ecosystem Services in Community Well-Being for a Sustainable Future

### Message from the Guest Editors

As shown through the Sustainable Development Goals (SDGs), it is now well understood the continued provision of ecosystem services is fundamental to the well-being of local communities, as well as the global community. As the human population grows and hence the demand for ecosystem services, communities will continue to place increasing pressures on the ecosystems, species and the ecological processes that underpin their well-being. Whilst much has already been done to address this issue, numerous questions still exist around the governance approaches, technology, scientific understanding (including cultural knowledge, use of indicators), and education and communication tools needed to ensure ecosystem services are sustainably managed now, and for future generations. This Special Issue is focused on nature-based solutions to sustainable development to improve community well-being at different geo-jurisdictional and time scales. Papers welcome that describe ecosystem service approaches that address the most pressing problems faced by urban, rural, coastal, and small island communities, and interactions across them.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
