Special Issue

Sustainability Advances in Supply Chain and Operations Management

Message from the Guest Editors

Companies engaging in design, implementation and operation in modern production and manufacturing environments require investment in a range of technical, human and financial resources. Therefore, the need to develop new and innovative manufacturing, operations and supply chain systems, and the associated management approaches, should not only focus on the systems' performance but should also focus on the cultural and human issues that emerge from the adoption and use of such systems. Likewise, researchers also need to address the impact on society and the environment from the implementation of new advancements in technology such as IE4.0 and IE5.0. The aim of this Special Issue is to disseminate research from the development of real-life sustainability advances in supply chain and operational systems, where new theories and approaches have been applied successfully to foster the improvement of sustainability in all its forms. We invite high-quality research articles that focus on detailed explorations of the application and impact of sustainable supply chain systems, along with their connections to the development of sustainable futures.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
