

Special Issue

Smart Grid: Power System Innovation and Energy Efficiency

Message from the Guest Editors

In the present geopolitical context, we are facing significant challenges related to both energy and emissions transitions, together with energy security provision. On the one hand, sustainability is greatly related to low-emission renewable energy sources' rapid scale adoption, while a series of issues remain to be addressed, such as the impact on energy poverty and vulnerable consumers, realistic alternatives to develop large-scale renewable energy sources and energy storage, with the aim of substituting the fossil-based fuels. Thus, we welcome the submission of scientific evidence-based papers on the above issues, without limitation. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
