Risk and Resilience in Sustainable Supply Chain Management

Message from the Guest Editors

In the context of the contemporary global economy, the vulnerability of supply chains to a diverse array of risks—encompassing natural disasters, geopolitical tensions, economic fluctuations, and operational disruptions—is becoming increasingly apparent. Such risks not only jeopardise the continuity of operations but also have an adverse impact on the sustainability objectives of organisations. The term 'resilience in supply chain management' is used to describe the ability of a supply chain to withstand and recover from disruptions. In this context, organisational resilience should encompass strategies such as diversifying suppliers, investing in technology, and fostering collaborative relationships with stakeholders. The integration of environmental, social, and economic considerations into resilience strategies is a key aspect of sustainable supply chain management. This ensures that responses to risk do not compromise the ability of future generations to meet their needs.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
