# The Emission and Effect of Volatile Organic Compounds (VOCs) at the Soil/Atmosphere Interface

# Message from the Guest Editors

Volatile organic compounds (VOC) are formed in situ as products of atmospheric transformations, several studies highlighted the importance of the soil on the global balance of the VOCs. In fact, soils can act as both sources and sinks for VOCs. Soil VOC emissions depend on the properties of the soil and the type of land use. VOC emissions from soils can have a significant influence on ecosystem processes. The assessment of VOC emissions should therefore advance our understanding of the impact of soil VOC emission on climate. Soil also acts as a sink for ground-level ozone, But the mechanisms describing the ozone deposition are still poorly explored. The aims of this Special Issue are to investigate: VOC emissions and deposition on soil as a function of all the biotic and abiotic parameters; atmospheric chemistry involving VOCs emitted by soil; ozone deposition on soil and reactivity; aerosols emission and formation from soil. We encourage the submission of experimental studies as well as field observations and modeling approaches to contribute to this SI in order to promote knowledge of soil VOCs impact on the atmosphere and soil functioning.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
