Special Issue

Integrated Coastal Restoration, Conservation and Resources Sustainability

Message from the Guest Editors

Tropical Marine ecosystems have deteriorated in past decades due to multiple anthropogenic and natural disturbances including excessive exploitation of natural resources caused by overpopulation, poor land-use practices, invasion of exotic species, and extreme weather conditions promoted by global climate change. Relatively recent disturbances, such as the STLC disease or the re-emergence of *Diadema antillarum* disease in the Caribbean have worsened the viability of these ecosystems. In this context, this Special Issue will focus on studies aimed at developing conservation and restoring strategies, and resource sustainability of marine ecosystems in hostile environments.

- Corals
- Mangrove
- Seagrasses
- Seaweeds
- Aquaculture

The contribution of this Special Issue would focus on the future of marine ecosystem with the objective of a thorough evaluation of the contribution of human intervention to their recovery or sustainability. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
