

Special Issue

ESG Management, Performance, and Corporate Sustainability: Insights and Innovations

Message from the Guest Editors

In recent years, the growing emphasis on environmental, social, and governance (ESG) factors has reshaped the way in which firms approach sustainability and performance (Albitar et al., 2020; Gerged, Tran et al., 2023). ESG management has emerged as a key determinant of long-term corporate success, impacting not only financial performance but also brand reputation, stakeholder engagement, and regulatory compliance (Moskovics et al., 2024). The integration of ESG metrics is now critical for companies seeking to demonstrate their commitment to sustainable practices while navigating the complex landscape of global business challenges (Gerged, Salem et al., 2023; Albitar et al., 2023). This Special Issue aims to explore the multifaceted relationship between ESG management, corporate performance, and sustainability through original research, theoretical papers, empirical case studies, and comprehensive reviews that offer novel insights into the role of ESG in shaping corporate strategies, performance measurement, and sustainability outcomes across industries and regions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
