

## Special Issue

# Economic and Social Sustainability within Quantitative and Qualitative Metrics in Housing and the Construction Industry

### Message from the Guest Editors

This Special Issue aims to illuminate the quantitative and qualitative metrics guiding social and economic sustainability within housing and the construction industry:

- Quantitative and qualitative indicators in housing: Explore the metrics determining social and economic sustainability in housing developments and investments;
- Social and economic dynamics in the construction industry: Analyze the interplay between social considerations, economic imperatives and sustainable practices in the construction industry;
- Innovations and their socio-economic impacts: Investigate the effects of innovative practices and technologies on socio-economic sustainability in housing and the built industry;
- Case studies: Offer empirical examples highlighting the successful implementation of quantitative/qualitative metrics in conjunction with social and economic sustainability considerations in housing and the broader construction industry.

In this Special Issue, original research articles and reviews are welcome. Research areas may include the suggested themes, but are not limited to them. We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
