

Special Issue

Sustainable Development in Light of Current Challenges in the Social and Economic Sphere

Message from the Guest Editor

There are extensive contemporary challenges in the sphere of sustainable development. These challenges are often diverse and require multidisciplinary efforts. Hence, both theoretical considerations (reviews) and creative works covering the results of research on practical grounds, among others, will be relevant to this Special Issue. The topics include, but are not limited to, the following: Sustainable organizations; Sustainable business models; Sustainable economics; Sustainable management; Innovation for sustainable development; Investment in sustainable development and the financing of sustainable development inputs; Formal legal frameworks for sustainable economic development; Evolution of sustainable development and its impact on the socio-economic environment; Sustainable society; The citizen/individual consumer in light of sustainable development—challenges and dilemmas; Education for sustainable development; Ethics and respect for rights in sustainable economic development. The topic of sustainable development in light of current socio-economic challenges is extremely broad. The proposed problem threads do not exhaust the subject.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
