Social, Economic and Environmental Sustainability in Vaccination Logistics: Global Supply Chain Experiences and Perspectives on COVID-19 Vaccination

Message from the Guest Editors

The global vaccination campaign against COVID-19 is a large economic, societal and also environmental challenge. This Special Issue collects contributions from different disciplines due to the complex challenges associated with the vaccination campaign: Economics and business administration, engineering, computer science, political and social science are supported in joining the discussion. Different steps, such as efficient and rapid vaccine production, storage, distribution and final administration of different types with the included physical as well as information flows and coordination are within the scope of the papers included. The overarching research question is how logistics and supply chain management concepts could contribute to a successful vaccination campaign against COVID-19 in order to support a global way out of the pandemic.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
