

Special Issue

Valorisation of Waste from Non-Dairy Plant-Based Beverages

Message from the Guest Editors

This Special Issue will include original and novel research papers and reviews that provide knowledge about the composition and possibilities of using wastes from non-dairy plant-based beverages, with the aim of contributing to sustainability and circular economy in the food industry. We welcome the submission of research works based on the application of non-thermal technologies (high homogenization pressure or ultrasound) as well as traditional ones (fermentation, milling or drying) addressed to reduce antinutrients, increase nutrients retention or digestibility and design new products, as well as those related to biofuels production.

Guest Editors

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
