Special Issue

Sustainable Venture Capital and Social Impact Investment Management

Message from the Guest Editors

New ventures are often regarded as an answer to the many social and environmental problems affecting the current world. SII is nowadays regarded as a new way to allocate capital to projects that combine a measurable social and environmental impact with economic sustainability, while at the same time providing financial returns.

Recently, the academic field has started to show interest in the topic, but an overall understanding of the phenomenon is still limited and fragmented. Thus, there is sufficient room to investigate whether, how, when, and under which conditions SII and VC financing act as important catalysts to develop sustainable new businesses, thus contributing positively to the environment and society, while generating a financial return.

This Special Issue welcomes general and specific contributions that examine the peculiarities, evolution, and impact of SII and VC financial instruments aimed at nurturing entrepreneurship for sustainable products and processes. Special attention will be given to those contributions that consider trade-offs and/or integration between different aspects that affect SII and VC finance towards sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
