

## Special Issue

# Architectural, Civil, and Infrastructure Engineering in View of Sustainability

### Message from the Guest Editors

We often ask ourselves: “What is our life going to be like?” The public expects responses from professionals, including architects and engineers. After all, construction industry and infrastructure consumes more than 40% of the produced energy and about 50% of the mass of materials, while the building industry emits 35% of greenhouse gases.

Hence, sustainable development in engineering has been one of the most discussed topics in recent years and is one of the key factors in sustainable development engineering.

The Sustainable Development Goals (SDGs) are expected to be reached through solutions in architecture and engineering which will bring about economic, social, and environmental benefits. Let this Special Issue be a forum for architects, engineers as well as scientists and practitioners to facilitate the expansion of knowledge, exchange experiences, present the latest achievements, and learn about trends in the development and applications of sustainability in architectural, civil, and infrastructure engineering.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
