

Special Issue

Views of Self and Nature: Implications for Pro- environmental Beliefs and Behaviors, Self-Transcendent Emotions, and Sustainability Practices

Message from the Guest Editor

This Special Issue will examine how considering self, nature, and self-nature relations can help tackle sustainability challenges. Submissions that leverage views of self and nature from the social sciences (broadly defined) in the service of producing prosocial and pro-environmental outcomes are encouraged. These papers should not only make contributions to one's home disciplines but also be accessible and applicable to scholars, educators, and practitioners in many domains. This Special Issue invites empirical papers and theoretical contributions that focus on some of the following concepts:

Self-nature representation; Inclusion of nature in self; Self-concept; Self-transcendence; Social and cultural identity; Nature size; Prosocial emotions and behaviors; Proenvironmental behavior; Environmental beliefs; Climate change; Community-based conservation; Place-based conservation

Original papers related to the above concepts that focus on connecting social science perspectives on self and nature with pro-environmental outcomes and sustainability practices are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
