

Special Issue

The Role of Digitalized Visual Management in Construction Projects

Message from the Guest Editor

The importance of visual management has been recognized by the lean construction research community. Improved visual management could contribute to reduction in time wasted on construction sites and to empowering the construction worker, thereby contributing to the U.N. Sustainable Development Goals. However, case studies on visual management have highlighted problems with outdated information and information outside of the workers' reach. To achieve better situational awareness, on-site digitalization of visual management tools has been proposed. This Special Issue invites papers that report research on digital visual management and its role in construction projects. Papers can cover implementation issues, technology-related topics, case studies, analysis of benefits and barriers, analysis of relevant data, decision-making analysis from worker point of view and other topics that are related to the overall theme of digitally distributing real-time and relevant information that can serve to increase the situational awareness and autonomy of construction workers and crews.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
