# Vocational Design for a Sustainable and Inclusive Future: The Role of Career Adaptability, Self-Determination, and Other Positive Dimensions

### Message from the Guest Editors

Dear colleagues, Today, vocational guidance and career counseling have to focus on new trajectories, focused on a representation of the future that involves high attention on the 'social', on the common good, and on sustainable development. In this respect, this Special Issue draws on the premise that effective vocational guidance and career counseling, also from the Life Design paradigm, could contribute to promoting an inclusive and sustainable development of society. Scholarly work can contribute to building inclusive and sustainable contexts: It is related to variables such as career adaptability, self-determination, resilience, and other positive resources. This call for manuscripts is an invitation to career counseling theorists, researchers, and practitioners to share your views on how we should respond, individually and collectively, to the challenges discussed above. This Special Issue welcomes a variety of articles types, from empirical to theoretical studies.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief
