

## Special Issue

# Circular Economy and Circular City for Sustainable Development

### Message from the Guest Editors

The circular city is the “adaptive and flexible city” capable of organising and reorganising systemic synergies, is the city that increasing cooperation and integration with public, private, and social actors, through synergies and symbiosis. However, it is also the city that promote the use of innovative technologies in the digital and energy fields, through the use of bio-material and nano-technologies for the built environment sector. The circular city promotes different types of symbiosis: within the industrial district, between the industrial district and the city, between the city and the port area (if any), between the industrial district and the port (if any), between the city and the non-urban territory (agricultural/forestry), as well as agro-ecological symbiosis in the non-urban territory.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
