

Special Issue

Sustainability in Agricultural Economics and Agri-Food Management

Message from the Guest Editors

There is a dire need for agriculture and all agri-food sectors to incorporate a sustainable development model, created jointly by companies and customers, through introducing new systems of production and consumption. Such a model aligns with several SDG goals of the United Nations. Therefore, private and public organizations, as well as consumers, have to re-design their strategies/actions, aiming to reach a sustainable framework from economic, social and environmental perspectives. The aim of this Special Issue is to publish articles that explore the varying ways to achieve the aforementioned sustainable framework, analyzing and proposing real solutions. Potential themes could be related to the adoption of innovative managerial techniques or different approaches to the market, as well as evaluation of digital technologies. We will also accept submissions of interdisciplinary works or single/multiple case studies. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
