

## Special Issue

# Sustainable Enterprise Operation and Supply Chain Management

### Message from the Guest Editor

This Special Issue aims to collate theoretical and empirical research employing qualitative and quantitative methodologies for analysis. The focus is on identifying key practices that can empower the manufacturing and service sectors to cultivate sustainability through their actions, both independently and collectively within the supply chain. Submissions from a range of disciplines are encouraged, with potential topics including business models for implementing circularity in operations, stakeholders' roles in promoting sustainable practices, lifecycle analysis supporting systems thinking, material flow analysis for resource longevity, the circular economy's role in fostering sustainability in manufacturing and services, and applying a systems thinking approach to develop closed-loop supply chains. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: operations management; logistics and supply chain management; knowledge management; industry 4.0; environmental sustainability

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
