

Special Issue

Achievements in the Agri-Food Supply Chain Leading to Sustainable Foods IV

Message from the Guest Editor

We started the series of these Special Issues on the agri-food supply chain (AFSC) in 2021, promoting innovative methods and research for a sustainable chain in view of the foreseen economic and social changes caused by the COVID-19 pandemic, which had ended then. We are now opening the fourth Special Issue entitled “Achievements in the Agri-Food Supply Chain Leading to Sustainable Foods IV”.

In this fourth volume of the Special Issue on the AFSC, at the center of recruiting papers is therefore contributions to “sustainable foods” at the end of the chain, and all the intermediary parameters that lead to them. Emphasis is given to research contributions and reviews on the sustainability of the food chain, which can be derived from results and achievements in innovation pathways, innovative foods, food safety, new technologies, food processes, consumers’ perceptions of foods, etc. Submissions can also include research topics on innovative food solutions tackling environment issues and conservation, climate changes, and crises.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
