

Special Issue

Nature-Based Solutions for Wastewater Treatment and Polluted/Degraded Ecosystem Restoration

Message from the Guest Editors

Ecosystem degradation and water pollution are global threats to the sustainability of flora, fauna and human mankind. Nature-based solutions (NBSs) are emerging as an important trend for developing low-cost and efficient technologies. However, there is still the need for more pilot plant and field studies to establish design parameters, various types of applications, large-scale performance evaluation and the demonstration of their socio-economic feasibility, among other important topics. The aim of this Special Issue is to gather in-depth information related to different NBSs oriented towards wastewater treatment and also to the restoration of degraded and/or polluted ecosystems. For this Special Issue, original research articles and reviews are welcome. All manuscripts that are accepted after peer review will be published online immediately after proofreading is completed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
