Sustainable Operations: Innovations in Management for a Greener Future

Message from the Guest Editor

In recent decades, the global community has recognized the urgent need to address environmental challenges like climate change and pollution, which threaten ecosystems and human well-being. Innovative responses from all sectors, especially business, are essential. Sustainable operations management focuses on strategies that minimize environmental impacts while enhancing economic and social performance.

Businesses are key drivers of environmental change through their operations and supply chains.

Advancements in management are crucial, as traditional approaches often prioritize economic performance over sustainability. New frameworks now integrate these elements, emphasizing their interconnectedness.

Technological innovations, such as digitalization and artificial intelligence, enhance monitoring and resource optimization, but challenges like lack of awareness and financial constraints remain. The Special Issue,

“Sustainable Operations: Innovations in Management for a Greener Future,” invites research and case studies on sustainable innovation, green supply chains, digitalization, and stakeholder engagement.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
