Innovative Approaches to Achieving Carbon Neutrality: Advancements in Carbon Capture, Utilization, and Storage for a Sustainable Future

Message from the Guest Editor

We are excited to invite you to contribute to our Special Issue entitled 'Innovative Approaches to Achieving Carbon Neutrality: Advancements in Carbon Capture, Utilization, and Storage for a Sustainable Future'. This Special Issue aims to explore cutting-edge advancements in Carbon Capture, Utilization, and Storage (CCUS) technologies, with a specific focus on their integration with combustion technologies and renewable energy systems. As the world strives for carbon neutrality, CCUS technologies are emerging as vital components in the quest to mitigate greenhouse gas emissions. This Special Issue will provide a platform for researchers to present innovative strategies and findings related to the development and application of CCUS technologies. We aim to bridge the gap between theory and practice by emphasizing real-world applications and the potential for CCUS technologies to enhance the efficiency of combustion engines, contribute to sustainable hydrogen production, and support renewable energy integration. In this Special Issue, we seek to highlight the interdisciplinary nature of CCUS technology research and its critical role in sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
