For Sustainable Development: The Differences in Water and Energy Consumptions in Urban and Rural Environments

Message from the Guest Editor

Water and energy are two essential resources recognized as indispensable inputs to modern society's economic and social development, whose consumptions are intensifying worldwide. The increasing demands represent an adverse impact on the environment in terms of resource scarcity and climate change, compromising the sustainable development of modern societies, which will not be supportable in the long run, making it urgent to manage these resources in a more sustainable way...
