

## Special Issue

# Advances in Sustainability Research at the University of Malta

### Message from the Guest Editors

This Special Issue focuses on research advances carried out at the University of Malta on the topic of sustainability in its widest meaning, in line with the SDGs. With over 100 scholars from the University of Malta who have authored or co-authored papers on this topic, it is natural to dedicate a Special Issue that addresses sustainability in a holistic and synergistic manner for different facets from the sustainable energy, water and food supply nexus to sustainable communities, health, industry, seas and land. The contribution to the science of climate change and climate mitigation, as well as the associated horizontal topics such as social, political and economic aspects, can all be addressed. The papers will help to bring insights and solutions to pressing issues that affect the local, regional, national, European and international sustainability. This Special Issue is open to all potential authors working at the University of Malta and to their co-authors from other institutions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
