

Special Issue

Waste to Biochar for a Sustainable Future

Message from the Guest Editors

This Special Issue aims to collect the most updated advances in biochar research, with a focus on the discussion about how waste-derived biochar could contribute to waste minimization, food security, water availability, and climate and land use change. Articles dealing with innovative methods of biochar production and characterization are also welcomed.

- biochar
- biomass waste
- agricultural residue
- food waste
- pyrolysis
- soil amendment
- pollutant adsorption
- carbon sequestration
- land use change
- climate change

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
