

## Special Issue

# Waste Management and Its Environmental Performance

### Message from the Guest Editors

With the acceleration of industrialization and urbanization, significant changes have taken place in individual lifestyle and consumption structure, resulting in increasingly serious waste problems (pollution, health, sustainability, etc.). Effective waste management from source, collection and transportation to disposal has been a subject of great concern. This social issue involves government departments, collection and transportation departments, waste disposal enterprises, residents and others. Whether it is achieved through the collaborative treatment of waste among multiple entities, or if each entity takes their own action (e.g., the formulation of effective policies by the government, separation and recycling at the source by residents, and market incentives by enterprises), it will affect the effectiveness of waste management and the level of harm caused by, resources reclaimed from, and overall reduction of waste. This Special Issue of Sustainability aims to improve waste management and ameliorate associated environmental issues.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
