

Special Issue

Sustainable Use of Water and Energy Resources in Infrastructure

Message from the Guest Editors

The recovery and saving of water and energy in infrastructures involves various engineering sectors. Furthermore, it affects all stages of the infrastructure life: from planning and design, to management and decommissioning and monitoring. Engineering oriented to sustainability is a recent and promising research area. Interest is growing in adopting a sustainable perspective in these fields. This Special Issue welcomes research papers that discuss the possibility of integrating sustainability principles inside engineering, dealing with specific and general methods and approaches that provide insight into the status, design, management, and restoration to optimize infrastructures from a water and energy point of view. We also welcome literature reviews and empirical papers. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
