

Special Issue

Water Availability under Climate Change

Message from the Guest Editor

This Special Issue aims to bring together recent advances in regional water assessments across a range of time scales, from the historical change perspective to future change scenarios. For a better understanding of the physical mechanism of the water cycle change, contributions based on new observations or reconstruction data, state-of-the-art modeling approaches, and advanced analysis methodologies are highly welcome. Future emission scenarios, as in the IPCC's Sixth Assessment Report (AR6), are encouraged to be considered as a standard for impact and risk assessment studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
