

## Special Issue

# Water Availability under Climate Change

### Message from the Guest Editor

This Special Issue aims to bring together recent advances in regional water assessments across a range of time scales, from the historical change perspective to future change scenarios. For a better understanding of the physical mechanism of the water cycle change, contributions based on new observations or reconstruction data, state-of-the-art modeling approaches, and advanced analysis methodologies are highly welcome. Future emission scenarios, as in the IPCC's Sixth Assessment Report (AR6), are encouraged to be considered as a standard for impact and risk assessment studies.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
