

Special Issue

Sustainable Water, Economic Management and Governance Issues

Message from the Guest Editor

Water is a precious natural resource and has a most significant importance for sustaining life and environment on the earth. In the coming century, the availability of fresh water is potentially one of the extremely pervasive crises for the world. Natural and man-made phenomena such as climate change, indiscriminate use of fertilizers, population pressure, rapid urbanization and industrialization are responsible for water depletion and deterioration of water quality of most freshwater resources in recent years. Therefore, water-related decisions will determine the future of major ecosystems, health of regional economies and political stability of the nations. Keywords

- Sustainable water resources management
- Application of remote sensing and GIS

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
