

Special Issue

Water Reuse and Environmental Sustainability

Message from the Guest Editors

Due to global warming and pollution, the amount of freshwater available to humanity may not be sufficient to meet the growing demand. Recent reflections raise fundamental questions for the environmental management of wastewaters and their reuses and represents one of the biggest challenges that society faces today on a global scale. Wastewater reuse requires a treatment that depends on how the waters will be used. Higher-level uses, such as irrigation of agricultural areas, require a more effective treatment than lower-level uses, such as pasture irrigation. The Special Issue aims to focus on some themes, among many: potential and limits for the reuse of urban wastewater in agriculture and as energy or material resource; technologies for the abatement of persistent organic pollutants, emerging and priority micropollutants; advanced tools for assessing waste water suitability for reuse; role of advanced technologies (IoT, digitalization, , modeling ...); cost analysis and economic sustainability; conflicts and regulatory difficulties in the use of purified water.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
