

Special Issue

Water and Wastewater Management, Resource Recovery, and Renewable Energy in Sustainability

Message from the Guest Editors

There has been a global effort toward reducing the environmental impact of industry on the world and the environment. It is clear that the demand for new technologies of environmental management and sustainability is rapidly becoming a major economic market. Sustainable development of the Earth and humanity depends critically on how well we are going to deal with environmental challenges and improve energy efficiency. This Special Issue aims to gather innovative contributions that advance knowledge of fundamental processes related to the sustainability of water and wastewater, including the treatment and management of drinking water, natural water, seawater, produced water, and so on. Additionally, we would like to consider original work presenting the innovative use of chemicals and nanomaterials in new technologies and analytical characterizations regarding water resource management and water quality treatment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
