Special Issue

Robotic Co-Workers for Work and Workforce Sustainability

Message from the Guest Editors

Ongoing advances in the capabilities, safety and accessibility of digital technologies and automation mean we are currently on the cusp of a seismic transformation of work places and processes. It is inevitable that robots will be increasingly deployed across occupational sectors to fulfil tasks that they can perform better than people. The current increase in robots in workplaces does not mean that people are simply being replaced. As human skills are still very much needed, more and more work tasks will be shared by human-robot teams working together. This special issue explores the impacts of human-robot collaboration on work and workforce sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
