Special Issue

New Findings on the Link between Workplace Bullying and Mental Health

Message from the Guest Editors

This Special Issue aims to deepen our understanding of workplace bullying and mental health/well-being regarding all potential stakeholders. Although methodological designs have significantly improved over the last 10 years, the relationship between workplace bullying and mental health/well-being is still mainly investigated with cross-sectional questionnaire studies. However, future studies might also implement a vianette design, the critical incident technique, or experience sampling methods/ecological momentary assessment to gain additional insights into the relationship between workplace bullying and mental health/well-being. Finally, more longitudinal studies are needed in order to inform research and practice, to determine at which point the effects of workplace bullying become long-lasting, and to identify the potential mechanisms. Moreover, longitudinal studies investigating mediators between workplace bullying and mental health/well-being are very rare. Empirical studies, theoretical papers, systematic reviews, and meta-analyses that tackle these issues are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
