

Special Issue

Sustainable and Innovative Agriculture in Issues of Energy Production and Food Safety

Message from the Guest Editors

Agriculture plays the most important role in creating food security and safe food. The effects of activities used in agricultural production, taking into account environmental conditions, influence the availability of food as well as the quality of manufactured products. The use of various types of production systems, such as ecological or environmentally sustainable systems, and the implementation of innovative systems can influence the environment and thus food quality and the health of consumers. In turn, the search for and improvement of alternative energy sources is crucial for energy and environmental protection, and broadly defined sustainable development. In this Special Issue, authors are actively invited to submit their papers covering high-quality novel research, as well as review studies regarding current research and innovations used in agriculture for energy and food production. This Special Issue is devoted to interdisciplinary research on plant production systems, methods of plant raw material processing, production of biofuels and high-quality foods.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
