

## Special Issue

# Innovations in Durability of Sustainable Concrete Materials

### Message from the Guest Editors

The durability of sustainable concrete materials depends on the intrinsic properties of the materials, including their chemistry, nano/microstructure and transport properties, under combined environmental actions and mechanical loading during service, are considered to be of great interest for many applications. This Special Issue encourages authors to submit research results on developments on the relevant topics in the research field of the durability of sustainable concrete. Contributions could take the form of experimental, computational modelling, and state-of-the-art review works in the following areas (but not limited to):

- Supplementary cementitious materials
- Alkali activated materials
- Wastes and by-products for more sustainable concrete
- Recycled aggregates (fine and coarse fractions)
- Fibre-reinforced cementitious materials
- Mix-design approaches for sustainable concrete
- Mechanical performance/characterization of sustainable concrete
- Durability of sustainable concrete
- Advanced modelling and simulation
- Service-life prediction
- Performance-based specifications for sustainable concrete

### Guest Editors

Dr. Woubishet Zewdu Taffese

Center for Intelligent Infrastructure, Missouri University of Science and Technology, Rolla, MO 65409, USA

Dr. Sandra Barbosa Nunes

Department of Engineering Structures, Faculty of Civil Engineering and Geosciences, Delft University of Technology, 2628 CN Delft, The Netherlands

### Deadline for manuscript submissions

closed (30 July 2023)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
