

## Special Issue

# Transport and Traffic Management for Green Environment

### Message from the Guest Editors

In the field of transportation sciences, significant emphasis is placed on transportation infrastructure itself. Its utilization, efficiency, and control over traffic flow can be enhanced through the implementation of technological devices and advanced systems, commonly known as transport telematics or Intelligent Transportation Systems (ITSs). One of the key aspects of leveraging transportation infrastructure and shaping its future development is traffic flow modeling, autonomous operations, and their impact on the environment. The comprehensive application of mobility extends beyond major transportation structures, such as tunnels and bridges, to complex urban layouts in historic city centers, where it is crucial to prioritize quality of life, emission reduction, and other essential environmental factors affecting transportation. Intelligent Transportation Systems also require significant operational and maintenance costs, which are just as important as the development of new systems.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
