

Special Issue

Sustainable Nanocrystals

Message from the Guest Editor

Sustainable preparation methods for cellulose nanocrystals (CNCs) and chitin nanocrystals (ChNCs) are promising as we face greater shortages of resources than ever before. Additionally, due to the abundant chemical groups on the surface of CNCs or ChNCs, various chemical reactions can be carried out on these nanocrystals. The investigation of the nanocrystal surface and control over their functionality is quite important since these multifunctional nanocrystals are the basic building blocks for fabricating advanced and hierarchical materials. Thus, a comprehensive understanding of the preparation, modification, characterization, and fabrication of these sustainable nanocrystals would contribute to the design of the next era of renewable multifunctional materials for a wide range of applications. This Special Issue, "Sustainable Nanocrystals", accepts original research, progress reports, and reviews covering the above topics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
