

Special Issue

Smart Transport Based on Sustainable Transport Development

Message from the Guest Editors

Smart transport, where artificial intelligence, the Internet of Things, and machine learning merge, has the potential to transform efficiency, accessibility, and safety across all types of transport. With this Special Issue, our intent is to amplify the conversation on the ongoing transformation in the transportation landscape. We encourage contributions covering a diverse array of themes encapsulating smart transport and sustainability. The suggested themes for this Special Issue include, but are not limited to:

- Methods to enhance sustainability and efficiency across transport networks.
- Application of groundbreaking technologies and concepts that revolutionize mobility.
- Comparative studies reflecting successful implementations of smart transportation.
- The influence of regulations and policies in advancing smart transportation.
- Socio-economic and environmental ramifications of smart transport solutions.
- Potential opportunities and foreseeable challenges in the realm of smart and sustainable transport.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
