Bio-Based and Alternative Sources for Food Pigments and Bioactives Production

Message from the Guest Editors

How alternative and innovative sources of natural, functional, and health-promoting bioactives can contribute to ensuring food security, better nutrition, improved livelihoods, and environmental sustainability in marginal environments in different parts of the world is the topic of this SI. The suitable and appropriate natural compounds from crops, plants, microorganisms, and other bio-based sources have been recognized for application in different fields such as functional food production and smart packaging systems. This SI aims to identify all possible alternative and sustainable ways for obtaining natural, functional, and health-promoting bioactives that have the potential to be used in food-related production.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
