

Special Issue

Artificial Intelligence (AI) and Sustainability of Businesses

Message from the Guest Editor

This Special Issue calls for intellectual contributions concerning artificial intelligence (AI) in connection to sustainable business models. Qualitative, quantitative, technical, and scientific papers are welcomed. Research areas may concern (but are not limited to) the following:

Streamlining business operations, optimizing business processes, the operational efficiency of businesses, data-driven business decisions, resource allocations, workforce management, supply chain visibility, supply chain management, and data mining and big data in business management.

AI-powered analytics related to consumer/customer behavior and consumer preferences, product innovation and development, sustainable products and services. AI-powered analytics related to mitigating and managing risks, sustainable initiatives, and customer satisfaction, thus contributing to long-term business sustainability

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
