

Special Issue

Integrated Urban Planning towards Sustainable Cities

Message from the Guest Editors

Sustainability of cities are increasingly being threatened at an intensity never experienced before. New challenges like public health concerns, climate extremes, resource scarcity, economic slowdown, and social divisions, many of which are exacerbated by recent pandemics and international tensions at the worldwide scale, impose new questions to planners that cannot be answered with the traditional fragmented approaches. We are interested in not only how “sustainable cities” can be defined in the midst of these new challenges but learning integrated approaches so as to achieve higher levels of sustainability in cities. Active and creative integration of the three dimensions of sustainability, or the three Es (environment, economy, and equity), may invite additional dimensions. Technological advances and shifts in everyday lives may also support new ways of monitoring, investigating, and understanding sustainability of cities. This special issue aims to become a platform for sharing recent knowledge and experiences on pursuing sustainable cities with a specific focus on integrating range of perspectives, methods, solutions, and strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
